GENERAL EXPLANATION

CENSUS COVERAGE

Method of Coverage—Effective with the 1967 Census of Business, a major shift in the method of compiling data was introduced. In the 1954, 1958, and 1963 Censuses data for all “employer” establishments (those which had some paid employment during the census year) were obtained through a mail canvass. Information for “nonemployers” was obtained from Federal income tax records.

In the 1967 Census of Business, retail firms were divided into two categories—the “mail universe” and the “nonmail” universe. The coverage of each component and the method of obtaining census information for these two groups are described below.

1. **The “nonmail” universe**—This group consists of firms which were not required to file a regular census return and includes the following categories:

a. **All “nonemployers”**—Consists of all firms with no paid employment during 1967. Sales information for these firms was obtained from 1967 Federal income tax records. Although made up of a large number of firms, the nonemployer segment accounts for only about 5 percent of total retail sales. (See “Comparison of the 1963 Census With the 1967 Census,” item 4, on the next page.)

In the 1967 Census, data for all nonemployer establishments were compiled from tax records. In the 1963 Census, data were compiled from only one-half of the nonemployer tax returns and were multiplied by 2 to establish census totals.

The census included only those retail nonemployer firms which reported a sales volume of \$2,500 or more during 1967 or, having been in operation for less than the full year, reported sales which would have reached a total of \$2,500 or more on an annual basis. This treatment is the same as in the 1963 Census.

b. **Selected “small employers”**—“Employers” consist of all business firms in the active records of the Internal Revenue Service (IRS) which were subject to payment of Federal Insurance Contribution Act (FICA) taxes. “Small employers” consist basically of all those single unit firms with payroll below a specified cutoff (except for a 10-percent sample of these which were included in the “mail” universe). The cutoff varied by kind of business and was designed, in most cases, to limit the “nonmail” group to establishments

which would account for approximately 20 percent of total sales in each kind of business. The “number-of-employee” equivalent of the payroll cutoff generally was in the range of one to three employees.

Data on sales, payroll, and employment for “under cutoff” employer firms were obtained from the administrative records of the Internal Revenue Service (IRS) and the Social Security Administration (SSA).

2. **The “mail” universe**—Information for firms in this group was obtained basically by means of a mail canvass. However, information on first quarter payroll and mid-March employment for single-unit employers (section b below) was obtained from IRS and SSA records. The “mail” universe includes the following categories:

a. **Firms in the census prec canvass**—The census prec canvass operation was basically designed to identify firms which operated units at more than one location.

Firms which were included in the prec canvass were drawn primarily from 1963 Census records of multiunit firms and large employers. Miscellaneous categories of organizations (e.g., cooperative associations; State, county, and municipal liquor stores; and retail stores of utility companies) were also included in the prec canvass.

b. **Firms not in the census prec canvass**—Other firms included in the “mail” universe consist of the following categories:

- (1) The 10 percent of “small employer” firms referred to in section 1-b above.
- (2) Other employers than those covered by section 1-b or 2-a above.

Comparison of the 1963 Census with the 1967 Census—Except for the method of coverage described above, the 1963 and 1967 censuses were conducted under similar conditions and procedures. Strict comparability of the data for the two censuses is limited by the following factors:

1. **Classification**—For both 1963 and 1967, nonemployer firms were classified on the basis of information supplied on the Federal income tax returns. However, the 1967 classifications for “nonemployer” firms were coded in less detail than in 1963. Therefore, 1967 data for the combination of “employer” and “nonemployer” establishments are presented in less kind-of-business detail than was the case in 1963. Data for employer establishments, however, are shown in full detail.

For 1963, nonemployer firms were classified by IRS personnel with technical assistance of Census Bureau personnel. For 1967, classification of these firms was performed by personnel of the IRS through use of a coded listing of the kinds of business which were to be separately identified. While the technique of classification was substantially the same and was based on the firm's description of its principal business activity, greater use was made in 1967 of "basket" classifications (e.g., miscellaneous food stores).

The 1967 Census classification for the small employer firms (see coverage of employers above) which were not mailed the Census report form was based on the following:

a. If the firm had been in business in 1963, the kind-of-business classification which had been assigned in that census was used.

b. If the firm was a "birth" since 1963, the SSA classification was used if it corresponded to a census classification.

c. If an adequate kind-of-business classification could not be assigned under the procedure outlined in a. and b. above, the firm was mailed a brief inquiry requesting information needed to assign such a classification.

d. If these three procedures proved inadequate, the firm's description of its principal business activity as entered on its IRS business tax return was used.

The 1967 Census classification for establishments in the mail universe (section 2 above) was assigned on the basis of answers to questions on sales by merchandise lines and other special inquiries.

In addition to differences in classification based on the method of enumeration, some changes were made in the 1967 Census in the individual kind-of-business classifications which are detailed in the "Kind-of-Business Classifications" section below. The kinds of business involving significant changes are building materials dealers, optical goods stores, and refreshment places. These changes importantly limit the comparability of the 1967 Census data for these kinds of business with those for the previous census.

2. Areas—The physical area of a number of urban places for which data are shown in the 1967 Census is not the same as it was in the 1963 Census because of annexations and other boundary changes which occurred since 1963.

3. Active proprietors—In the 1963 Census, the number of active proprietors of unincorporated businesses was computed by crediting sole proprietorships with one proprietor and partnerships with two proprietors for each establishment in business during the week of November

15. In this report, the count of active proprietors is based on crediting each sole proprietorship with one active proprietor and each partnership with two active proprietors for the following types of firms, including multiunits firms:

a. All "employer" firms which had a first quarter 1967 payroll.

b. All "nonemployer" firms in business the full year.

c. Every second "nonemployer" firm not in business the full year.

4. Coverage of nonemployers—Although a comparison of data for nonemployer firms from the 1963 and 1967 Censuses seems to indicate that there was an increase in the number of such firms and that they accounted for approximately as large a proportion of total retail sales volume in 1967 as in 1963, these conclusions are subject to the following limitations:

The combination of (1) the census processing cutoff occurring before the completion of the flow of tax forms from which the census nonemployer data were derived and (2) other processing omissions is estimated to have led to a loss of about 50,000 nonemployer firms, accounting for about one-half of 1 percent of retail sales volume in 1963. This estimate, which is based on a study of a sample of tax forms made after the 1963 Census results were compiled, reflects a more substantial census omission than previously had been estimated. Because of a later processing date for the 1967 Census, omissions from this census are believed negligible. Both censuses probably omitted a small number of nonemployers (accounting for a negligible sales volume) because the tax form kind-of-business description was inadequate to indicate they conducted an in-scope kind of business.

As noted in section 1-a under "Method of Coverage" above, only those retail nonemployer establishments were included in the census which reported a sales volume of \$2,500 or more during 1967 or, having been in operation for less than the full year, reported sales which would have reached a total of \$2,500 or more on an annual basis. While these are the same rules used in the 1963 Census, a modification to reflect price changes probably would have resulted in the exclusion of several thousand additional marginal firms.

5. Payroll—In 1963 the inclusion in payroll of gratuities received by employees from patrons was not requested. In 1967, both in the case of payroll reported to the Internal Revenue Service and payrolls reported to the Census Bureau, businesses were requested to include in payroll the amount of tips and gratuities which were reported to employers as received by employees from patrons.

Types of Areas Covered—This series of reports presents data by kind of business for the following areas:

1. The State as a whole.
2. Each standard metropolitan statistical area.
3. Each county.
4. Each "city" of 2,500 inhabitants or more.

The term "city" for purposes of these reports includes places having 2,500 inhabitants or more in the 1960 Census of Population (or later special censuses) and which were incorporated as cities, boroughs, villages, or towns. It does not include towns in New England, New York, and Wisconsin which are not considered "incorporated places" for Census Bureau purposes.

In addition, data are shown for the following areas not classified as incorporated places:

1. Towns in the New England States which had an urban population, by Census of Population rules, of 2,500 inhabitants or more or which had a total population of 10,000 or more.
2. Townships in New Jersey and Pennsylvania which had 10,000 inhabitants or more.

The standard metropolitan statistical areas (SMSA's) for which data are shown are those defined by the Bureau of the Budget.¹ A standard metropolitan statistical area is a county or group of contiguous counties (except in New England) which contains at least one central city of 50,000 inhabitants or more or twin cities with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are essentially metropolitan in character and are socially and economically integrated with the central city. In New England, towns and cities rather than counties are the units used in defining an SMSA.

In addition to the above areas, the series of reports for "Major Retail Centers" presents data for the central business districts (CBD's) of 134 cities which have a population of 100,000 inhabitants or more and for approximately 1,700 major retail centers (other than CBD's) located in SMSA's.

EXPLANATION OF TERMS

Establishments—An establishment is a single physical location at which business is conducted. An establishment is not necessarily identical with the "company" or "enterprise" which may consist of one or more establishments. Census of Business figures represent a summary of reports for individual establishments rather than companies. For businesses

which were mailed a census form, separate information was obtained for each location where business was conducted, including each location of multiunit organizations. Each report was tabulated in accordance with the physical location at which the business was conducted.

Where two or more activities were carried on at a single location under a single ownership, all activities generally were grouped together as a single establishment, and the entire establishment was classified on the basis of its major activity, with all data for it included in that classification. However, in cases where distinct and separate economic activities (for which different industry classification codes were appropriate) were conducted under the same ownership at a single location, and where conditions prescribed by the Standard Industrial Classification (SIC) Manual² for recognizing the existence of more than one establishment were met, separate establishment reports for each of the different activities were reported in the census.

In the case of leased departments (separately owned businesses operated as departments of a retail business under another ownership such as a separately owned shoe department in a department store), only a single establishment combining leased departments with the retail establishment in which they are located is recognized for 1967 Census purposes.

Sales—Sales include merchandise sold and receipts from repairs and from other services to customers whether or not payment was received in 1967. Sales are net of deductions for refunds and allowances for merchandise returned by customers. Trade-in allowances are not deducted from total sales. Total sales exclude amounts other than those received from customers, such as income from investments, rental of real estate, etc. They include local and State sales taxes and Federal excise taxes collected by the store directly from customers and paid directly by the store to a local, State, or Federal tax agency. Gasoline, liquor, tobacco, and other excise taxes which are paid by the manufacturer or wholesaler and passed along to the retailer are also included.

Sales do not include retail sales made by manufacturers, wholesalers, service establishments, and other businesses whose primary activity is other than retail trade. They do, however, include receipts other than from the sale of merchandise at retail (e.g., service receipts, sales to industrial users, and sales to other retailers) by establishments primarily engaged in retail trade.

Although the count of establishments in this report represents the number in business at

¹ Executive Office of the President, Bureau of the Budget, *Standard Metropolitan Statistical Areas, 1967*, as amended January 15, 1968.

² Executive Office of the President, Bureau of the Budget, *Standard Industrial Classification Manual, 1967*.

sales of all establishments in business at any time during the year. Data for nonemployer establishments are included in the tables if they operated at an annual sales volume rate of \$2,500 or more; however, data for part year nonemployers have not been projected to a full year's operation.

Payroll, entire year—Payroll includes all forms of compensation such as salaries, wages, commissions, bonuses, vacation allowances, sick leave pay, and the value of payments in kind (such as free meals and lodgings) paid during the year to all employees. Tips and gratuities received by employees from patrons which are reported to employers are included. For corporations, it includes amounts paid to officers and executives; for unincorporated businesses, it does not include compensation of proprietors or of partners. Payroll is reported before deductions for social security, income tax, insurance dues, etc. This definition of payroll is the same as that used by the Internal Revenue Service for purposes of reporting on Form 941.

Payroll for the first quarter of 1967—This item consists of payroll, as defined above, paid to persons on the payroll during the January–March 1967 quarter.

Paid employees for the pay period including March 12, 1967—Paid employees consist of the number of employees, including salaried officers and executives of corporations, who were on the payroll in the pay period including March 12, 1967. Included are employees on paid sick leave, paid holidays, and paid vacations. Proprietors and partners of unincorporated businesses are not included. The definition of paid employees is the same as used in reporting on IRS Form 941.

Active proprietors of unincorporated businesses—The number of active proprietors shown in this report is based on crediting each sole proprietorship with one active proprietor and each partnership with two active proprietors for the following types of firms:

1. All payroll firms which had a first quarter payroll.
2. All nonpayroll firms in business the full year.
3. Every other nonpayroll firm not in business the full year.

For multiunit proprietorships and partnerships, proprietors were credited to only one establishment of such multiunits.

Central administrative offices and auxiliaries—Each company included in this census was asked to identify and report separately as

those locations whose primary functions were to manage, administer, service, or support the activities of the other establishments of the company. Data for such central administrative offices or auxiliaries which primarily service retail establishments are given in tables 12 and 13 of this report but are not included in the other tabulations of this report.

KIND-OF-BUSINESS CLASSIFICATIONS

Retail trade, as defined in major groups 52 through 59 of the 1967 edition of the SIC Manual, includes establishments primarily engaged in selling merchandise to customers for personal, household, or farm use. Some of the important characteristics of retail trade establishments are: (1) The establishment is engaged in activities to attract the general public to buy; (2) the establishment buys or receives merchandise as well as sells; (3) the establishment may process its products, but such processing is incidental or subordinate to selling; and (4) the establishment is considered "retail" by the trade.

In this report, liquor stores operated by State and local governments, classified in SIC major groups 92 and 93, are also included.

Excluded from retail trade are places of business operated by institutions and open only to members or personnel, such as school cafeterias, restaurants and bars operated by clubs, eating places operated by industrial and commercial enterprises for their own employees, establishments operated by agencies of the Federal Government on military posts, hospitals, etc. (As noted previously, there is a table in this report showing data for establishments on military, air, and naval posts.)

Establishments covered by the census were assigned a kind-of-business classification in accordance with the provisions of the 1967 edition of the SIC Manual. However, because in some instances a more detailed classification is required for census purposes than is available in the SIC Manual, additional kinds of business have been identified within the SIC categories.

It should be noted that kind-of-business classifications are not interchangeable with commodity classifications. Most businesses sell a number of kinds of commodities. The kind-of-business code assigned generally reflects either the individual commodity or the commodity group which is the primary source of the establishment's receipts or some mixture of commodities which characterize the establishment's business. Thus, the classification of establishments by kind of business generally does not make it possible to determine either the number of establishments

handling a particular commodity or the sales of that commodity. For example, the "food group" classification excludes stores selling some food if the sale of food is not the primary source of receipts; moreover, even though stores are classified as "food stores" some of their receipts may be derived from the sale of nonfood products. (Some indication of the extent to which various broad groups of commodities or lines of merchandise are characteristic of different kinds of business will be available in the Census of Business report, Sales by Line of Merchandise, Series BC67-RS.)

The basis for kind-of-business classification is described above in the sections under "Method of Coverage" and "Comparison of the 1963 Census With the 1967 Census—Classification." Descriptions of those kinds of business for which data are provided follow.

BUILDING MATERIALS, HARDWARE, AND FARM EQUIPMENT DEALERS (SIC Major Group 52)

This major group includes establishments primarily selling lumber, building materials, the basic lines of hardware, paint, wallpaper, glass, electrical supplies, roofing materials, and other equipment and supplies for all types of construction. Establishments primarily selling farm equipment are also included. Establishments in this group sell to contractors as well as to the general public. Establishments in this group which do not deal in lumber or millwork are classified as retail trade if sales to the general public equal 15 percent or more of total sales and sales to the general public and contractors combined equal 50 percent or more of total sales; otherwise they are classified as wholesale trade. (See below for discussion of treatment in 1967 of establishments which deal in lumber.)

Lumber and other building materials dealers (SIC 521)—Establishments primarily selling lumber, millwork, and other building materials and construction supplies such as brick, tile, cement, sand and gravel, cinder blocks, fencing materials, storm doors and windows, wallboard and roofing materials. In the 1967 Census of Business, data for lumber yards and for building materials dealers have been combined into a single kind-of-business classification, "Lumber and other building materials dealers." In the 1963 Census of Business data for these two kinds of business were shown separately.

Establishments which deal in lumber as well as other building materials, whose reported sales of lumber and millwork are 1 percent or more of their total sales and whose sales to the

general public amounted to 1 percent or more of total sales, are classified as retail if their sales to the general public and to contractors combined equal 50 percent or more of total sales. In 1963, establishments dealing in lumber and other building materials were classified as "wholesale" if less than 15 percent of their total sales were to the general public.

Plumbing and heating equipment dealers (SIC 522)—Establishments primarily selling plumbing, heating, and air-conditioning equipment and supplies. Establishments primarily engaged in installation on a contract basis or in repairs are included in Contract Construction.

Paint, glass, and wallpaper stores (SIC 523)—Establishments primarily selling paint, glass, and wallpaper or any combination of these lines. Establishments primarily engaged in installing glass or in wallpapering or painting are not included in Retail Trade.

NONSTORE RETAILERS (Part of SIC Major Group 53)

Mail-order houses (SIC 532)—Establishments primarily selling merchandise as a result of orders received by mail. Customers are made aware of goods available for sale through

catalogs, mailing pieces, advertisements in newspapers and magazines, and advertising on radio and television. Houses operated by companies which operate catalog order stores and catalog order desks in other retail establishments of the company, also fill orders from those sources. Catalog order stores are included in this classification and they are counted as separate establishments. Sales made from catalog order desks are included with the sales of the retail establishment in which they are located.

In some tabulations at the national or geographic division level, mail-order houses are divided into subclassifications on the basis of the merchandise they sell in the same manner as the store-type establishments.

Merchandising machine operators (SIC 534)—Establishments primarily selling merchandise through coin-operated vending machines which are generally located on the premises of other businesses. In the 1963 Census of Business this industry was titled "Merchandise vending machine operators."

Since a large number of merchandise vending machine operations are conducted in conjunction with the operation of manufacturing plants and of wholesale and other establishments not classified in retail trade, data for "retail" merchandise vending machine operators should not be interpreted as providing a measure of total sales through merchandise vending machines. The data for "retail" merchandise vending machine operators also do not include sales made through vending machines owned by establishments classified in other kinds of retail trade. Merchandise vending machine operators are divided into subclassifications on the basis of the merchandise sold in the machines on location as of the end of the census year. Operators of coin-operated service machines such as washers, dryers, music machines, and amusement and game machines are included in the Selected Services portion of the 1967 Census of Business.

Direct selling establishments (SIC 535)—Establishments primarily selling merchandise by house-to-house canvass, by party plan, or from a truck. When the canvassers are employed by the organization which they represent, the "establishment" is the location from which they operate. However, many of the important organizations whose products are distributed in this manner utilize self-employed canvassers as their representatives. Each such canvasser is counted as an "establishment" in this report. As a result, the "number of establishments" count is considerably larger than would be the case if the count were based on

the primary organizations whose products are being distributed. Establishments in operation throughout the census year were included if their annual sales were \$2,500 or more; establishments in operation during part of the census year were included only if their sales were at an annual rate of \$2,500 or more. Consequently, the "number of establishments" in this category should not be interpreted as being a count of the total number of self-employed canvassers.

Direct selling organizations are divided into subclassifications on the basis of the merchandise they sell. Establishments selling ice cream, frozen custard, soft ice cream and similar refreshment items from trucks were included with "refreshment places" (part of SIC 5812) in the 1963 Census of Business but are now included in this classification. In the 1963 Census of Business this industry was

titled "Direct selling (house-to-house) organizations."
